# Rhinosinusitis

Rhinosinusitis is the inflammation of the mucosa of the nose and sinuses, leading to the accumulation of mucus and the subsequent sensation of congestion.

If symptoms persist or increase after 5 days, we talk about **Acute Rhinosinusitis**, which can last up to 12 weeks, whereas with **Chronic Rhinosinusitis** symptoms last for more than 12 weeks. Rhinosinusitis is mainly of viral origin, and at least 30% of the population suffers from Rhinosinusitis once a year.

The main symptoms are:

- Facial pain or pressure
- Nasal congestion
- Rinorrhea or nasal secretion
- Nasal blockage
- Reduction or loss of sense of smell

Other symptoms can be:  
headache, fever, yellowish mucus...

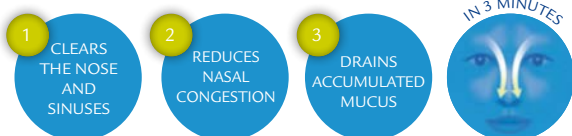

Several validated quality-of-life studies have shown that Rhinosinusitis symptoms have an impact on well-being, decreased work productivity, decreased enjoyment and compromised socialization.

# Nasodren®

**Nasodren**, a natural cyclamen extract, is both an effective and a reliable solution that relieves Rhinosinusitis symptoms in a physiological way.

**Nasodren**'s unique mechanism of action activates physiological (natural) mechanisms which drain the accumulated mucus from the nose and the sinuses.

- Clinically proven efficacy
- Quick onset of action
- Fast relief from symptoms
- Shortens time to recovery
- Good tolerability and safety profile
- Only one daily dose
- 1 pack / 1 treatment
- Cyclamen extract 100% natural
